ABOUT VCS

Part of the Woodall Nicholson Group, VCS Ltd is a market leader in the conversion of vehicles for UK emergency service fleets.

An expert team of designers, engineers and bodybuilders have decades of experience in converting a range of standard production cars, MPVs and vans for public and private sector fleets.

Our conversion service is truly a one stop shop. We can source your base vehicles and manage the project from first draft design to the final decal being applied.

MANUFACTURER RELATIONSHIPS

Strong relationships with leading vehicle manufacturers allows us to source your base vehicles with the minimum of fuss.

NATIONAL COVERAGE

Our dedicated team of mobile engineers provide nationwide aftersales support to keep your fleet on the move.

QUALITY AND RELIABILITY

Every vehicle is built to meet ISO 9001:2015 standards ensuring a long life and absolute reliability for your vehicles.

ONE STOP SHOP

Full range of services from vehicle procurement to conversion and fit out, carried out by expert staff trained to OEM standards.

FLEXIBLE VEHICLE SOURCING:

- ✓ Any vehicle
- ✓ Any conversion
- ✓ Any size

OUR CUSTOMERS BENEFIT FROM:

- ✓ Single point of order
- ✓ Single point of invoice
- ✓ OEM approved conversions
- ✓ OEM warranty cover

POLICE

With a wealth of experience in the production of dedicated police vehicles, our engineering team design each vehicle we manufacture to stand up to the complex and demanding requirements of this sector.

We offer a full design consultation at the start of a project to ensure that every vehicle is entirely fit for purpose. Using the latest in CAD technology, we engineer all our police vehicles to deliver the required protection to threat level whilst managing payload to maintain the vehicle's handling characteristics.

We offer an unparalleled range of police vehicles, including:

- ▶ PSU
- ▶ Dog vehicles
- ▶ ARV/Rapid response
- ▶ Ballistic protection
- ▶ Cell vehicles
- ▶ Forensic vehicles
- ▶ Mobile stations/command units
- ▶ Load carriers, grid boxes and secure storage

AMBULANCE

With thousands of ambulance conversions to our name, from one-off bespoke projects to a hundred plus strong fleet of all electric vehicles for one of the UK's largest ambulance services, our knowledge of this sector is peerless.

By utilising innovative CAD design techniques combined with precision engineering and procurement of specialist materials, we offer a range of robust and reliable conversions that deliver exceptional functionality while providing the maximum achievable payload for your base vehicle.

In all our ambulance conversions, we place an emphasis on accessibility, comfort and ease of operation.

Our ambulance conversions include:

- ▶ Front Line DCA and Modular DCA
- ▶ RRV
- ▶ Electric & hybrid medi-cars
- ▶ Bespoke racking and secure storage
- ▶ Passenger transfer

SPECIALIST AMBULANCE PROVIDER

From one-off bespoke conversions to hundred strong fleets of electric drive train ambulances.

FIRE

With more than two decades of experience, servicing the needs of UK Fire and Rescue fleets, our capabilities in vehicle design and conversion are second to none.

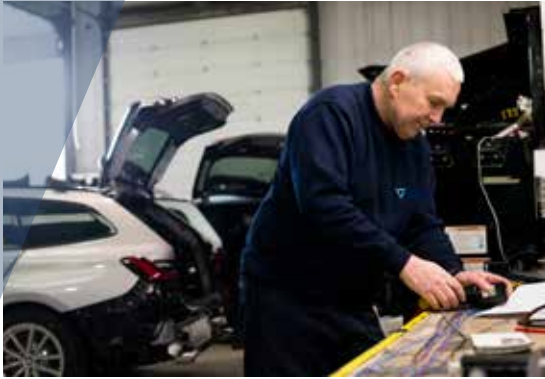

This experience, plus an absolute focus on reliability, usability and whole life value of fleet assets, VCS brings an insight to Fire and Rescue vehicle conversion that very few convertors can offer.

Industry leading CAD design and engineering techniques ensure every vehicle we manufacture stands up to the complex and demanding requirements of its role.

Our sector projects include:

- ▶ Dog vehicles
- ▶ Mobile stations/command units
- ▶ Tactical response
- ▶ Incident support
- ▶ Search and rescue

ELECTRICAL INSTALLATIONS

With extensive experience carrying out conversions of emergency service vehicles, our specialist electrical installation team are well versed in the build and installation of integrated electrical and communication systems for UK Blue and Amber Light services.

We offer full project management of this complex area during the life cycle of your project covering the design, quality control, supply chain management, and post-production engineering services to ensure your vehicles are fully equipped with everything your service requires.

FULL PROJECT MANAGEMENT

Our dedicated electrical engineers can handle complex electrical installations across a broad range of blue light vehicles.

From fully equipped control and command centres with communication masts and LED screen arrays, to standard day-to-day communication equipment, our engineers can help with all manner of electrical projects including:

- ▶ Hybrid and Electric vehicle installation
- ▶ Communication System Integration
- ▶ Pre-production (plug & play)
- ▶ Overt and Covert system installation
- ▶ Mobile Data Integration
- ▶ Tracker Installations
- ▶ Incident Data Recording (IDR)
